Company Profile

16 years of automotive industry exposure in press shop and welding components in research and development of innovative process controls resulting in foundation of Velkommen Engineering.

Velkommen Engineering has excellence in the field of manufacturing mass production of small stamped and formed metal parts in Automotive, Electrical, Electronics, Construction and Hardware Domain.

Product Portfolio offerings

Automotive

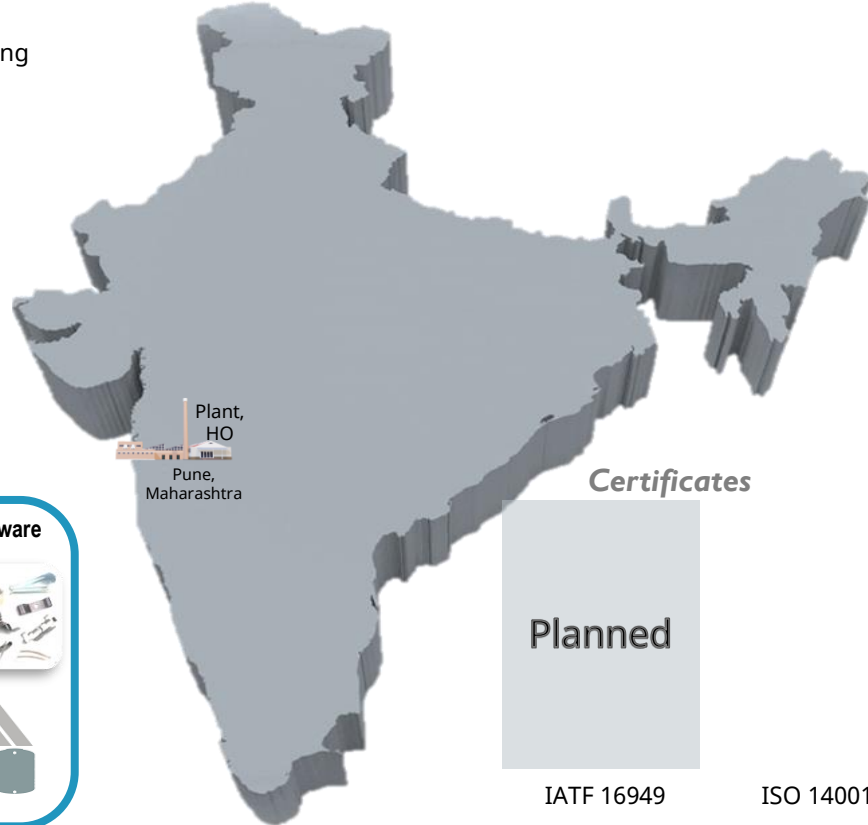

Electrical & Electronics

Construction & Hardware

HARDWARE AND
CONSTRUCTION
SUPPLIES

Certificates

Planned

IATF 16949

ISO 14001

AUTOMOTIVE PRODUCTS

Velkommen Engineering are the Manufacturers of comprehensive premium quality components for Automotive Industry, the components included are **Spring band clamps, wire band clamps, Ear clamps, Metal Sleeves, Different types of support brackets, Mounting brackets & U Shape brackets which are used in automotive sub-assemblies like inner door, outer door ,structures side Panels** which was having thickness upto 1.7mm and width upto 40mm.

ELECTRICAL PRODUCTS

In the field of Electrical Industry, the components included are Starter relay Brackets ,Washers, Various Electrical pin Sockets, Amp Crimp Connectors, Ring Lugs, Copper Lugs (Thimble), stud connector, Battery Contact Spring (Leaf) Multiple Cell. The materials used are ,Copper, Brass, Nickel/Copper/ Zinc Plated parts and as per customer requirements.

WIRED PIN PRODUCTS

Velkommen Engineering has the capabilities to produce precision custom wire bending products from 1.0 mm wire diameter to 4.0mm wire diameter for various industries & applications.

Those are used in a vast array of applications from locking manufacturers, automotive industries, spring tines & agricultural equipment, return levers, hinge mechanisms etc.

HARDWARE PRODUCTS

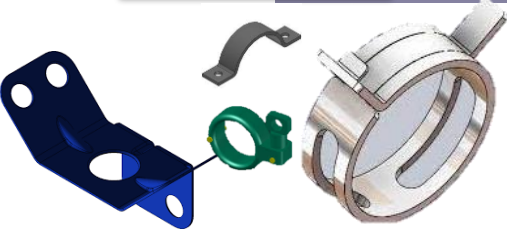

Velkommen Engineering Manufacturer of wide range of premium quality components for Hardware & Construction Industry, The components included are wide range of Wire Bend components, Pipe clips and Clamps. The materials used would be as per Customers Specifications.

Engineering Capabilities

Design

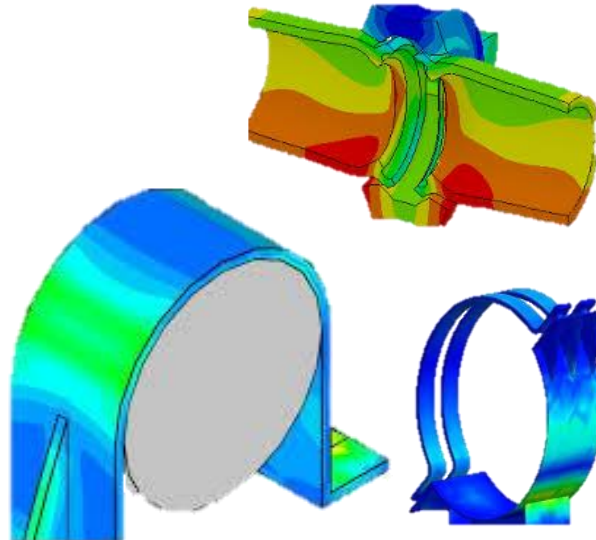

- 3D Designing
 - AUTO CAD
 - NX
 - CREO
 - SOLID WORKS

Analysis & Calculations

CFD Analysis (Third Part Support)

- SST
- Temperature
- Load

Prototype Shop

MAIN ACTIVITY

- Strip Stamping
- Multi spindle Bending
- Welding
- Final Assembly
- Quality Inspection

Spring Band & Wire spring band Clamp

Features

- One-piece, bolt-free hose clamp
- Even distribution of clamping force
- Optimum roundness
- Temperature resistance from -40°C to 200°C
- Automatically re-tensions to accommodate temperature fluctuations

Applications

- Automotive Engine manufacturing
- Cooling and heating water circuits
- Fuel vent system
- Air ducts
- Water and brine outlet lines
- Machine building
- White goods
- Agricultural machines

Features

- Uniform compression and uniform surface pressure in 360°
- Even distribution of clamping force
- Optimum roundness

Applications

- Cooling and heating water circuits
- Automotive vehicle industry
- Fuel vent system
- Air ducts
- Water and brine outlet line
- Agricultural machines

Different types of Brackets

- Different types of support brackets, Mounting brackets L & U Shape brackets which are used in automotives, Agriculture and earth moving equipment sub-assemblies like inner door, outer door ,structures side Panels which was having thickness upto 1.7mm and width upto 40mm.

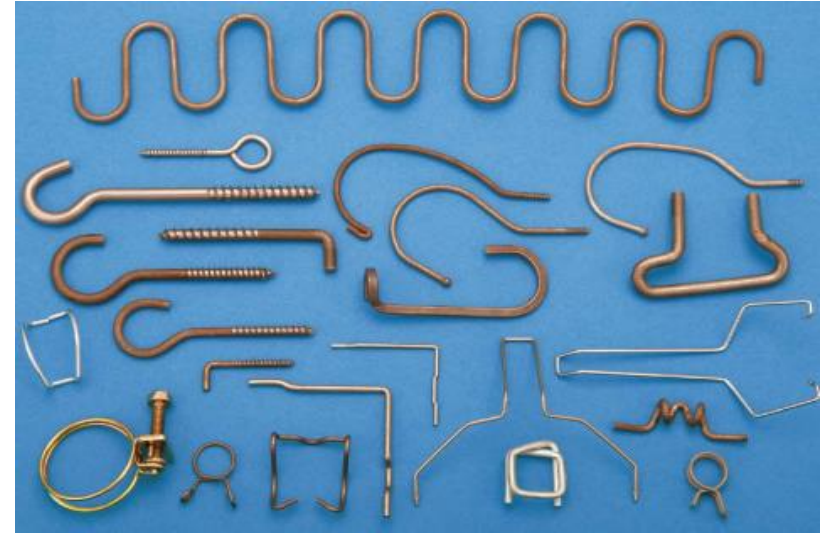

• **Electronics & Electrical Industry, the components included are Starter relay Brackets and Washers, Various Electrical pin Sockets, Amp Crimp Connectors, Ring Lugs, Copper Lugs (Thimble), Quick Connects, Screw Rivet, stud connector, Battery Contact Spring (Leaf) Multiple Cell. The different materials are used for manufacturing of this parts, Stainless steels of various grades, Copper, Brass, Nickel/Copper/ Zinc Plated parts and as per customer requirements.**

Wired Pin Products

Features

- Velkommen Engineering has the capabilities to produce precision custom wire bending products from 1.0 mm wire diameter to 4.0mm wire diameter for various industries & applications.

Applications

- Lock manufacturing industry.
- Automotive industry
- Spring Tines
- Agriculture equipments
- Return levers
- Hinge mechanism

Construction & Hardware Products

❑Velkommen Engineering LLP Manufacturer wide range of premium quality components for Hardware & Construction Industry, the components included are wide range of Wire Bend components, Pipe clips and Clamps. The materials used would be as per Customers Specifications.

Thanks!
